

FIRST Environmental Connection
TENANT PROFILE:

Suniva, Inc.

Grounded in cutting-edge research, Suniva developed a new solar technology that makes clean energy cheaper and more practical.

In the lab, the company's high-efficiency, silicon photovoltaic cells set a world record and quickly caught the interest of the public and venture capitalists. The company simply needed a place to start producing and testing its new technology.

To allow Suniva's concepts to become a reality, they sought manufacturing space in short order. First Industrial Realty Trust had an ideal solution: a 60,000 s.f. space on the outskirts of Atlanta that allowed the company to develop and build its efficient, low-cost solar cells.

Suniva, Inc. and many more of our 2,300 tenants are committed to working with the natural environment. We are delighted to support these tenants' goals in making a healthier world. To hear more about our company's endorsement of green policies, visit www.firstindustrial.com/environment.
